

January 2011

High Edge Consulting Limited provides consultancy, training and auditing services for management systems in line with ISO 9001, ISO 13485, 21 CFR part 820 and worldwide Medical Device Regulatory Affairs requirements.

We are committed to identifying and reducing the pollution and consumption linked to the provision and delivery of the services and associated with the business in general.

To support this commitment we provide clear and concise communications to both staff and customers, where appropriate, to ensure they understand the business commitment to environmental performance and the importance their actions have in enabling and supporting improvement.

High Edge has implemented an environmental management system, in compliance with the requirements of ISO 14001, to support the business in positively working in line with its legislative and other applicable requirements. The business commits to managing, maintaining and improving this environmental management system to ensure it continues to support the business and improves environmental performance.

In support of this policy a series of objectives have been created by Top Management, supported by ongoing monitoring and measurement, which are reviewed on an ongoing basis as part of the business management process.
